ENVIRONMENTALLY FRIENDLY FOR A BETTER TOMORROW!

Dear Sir or Madame:

We would like to take this opportunity to inform you of our services. Lyman Dust Control, Inc has been in the dust abatement business in the Western States for over thirty-five years. We offer experience and quality, and we are fully licensed, insured and bonded.

The need for dust control is apparent and dust palliative provides a superior, economical treatment for stabilizing unsurfaced roads and keeping them free of dry-weather dust. Dust abatement reduces potholes, washboarding, and frost heaving. Out-of-control dust is a large cause of respiratory problems. Airborne dust can also cause significant damage to electronic equipment and machinery.

Lyman Dust Control's fleet-of-trucks is fully equipped with state-of-the-art computerized BearCat spreaders. Our operators are fully qualified and trained. We have, on hand, a complete line of environmentally safe, EPA approved dust control products and offer them at an affordable price.

We look forward to serving you and taking care of your dust abatement needs this season. Please do not hesitate to call (1-800-952-6457), e-mail (jane@lymandustcontrol.com), or write for more information.

Sincerely,

Jerry Lyman

Jerry Lyman, Vice-President
